

ADDENDUM NO. 1

RFQ-PW-02-2026 Snow Clearing

Issued: October 15, 2026

This Addendum forms part of the RFQ documents and shall be acknowledged by all Proponents when submitting their quotation.

1. Revision to Pricing Requirements

The section entitled “PRICING” is amended as follows:

Pricing shall be provided separately for each location on a per-trip basis. Proponents may submit quotations for one or more locations, and each location may be awarded individually.

For each location, proponents shall provide:

- A per-trip price for complete winter maintenance service, including snow plowing, shovelling, and salting. Salt shall be applied to areas cleared of snow following each clearing.
- A per-trip price for salt-only application, to be used when weather or site conditions require ice control measures, including freezing rain, icy conditions, or freeze-thaw events.

Each visit to a location shall constitute one billable trip.

2. Revision to Project Specifications

The section entitled “PROJECT SPECIFICATIONS” is amended as follows:

Snow Clearing

The existing snow-clearing requirements remain in effect, including the designated clearing areas and snow-piling locations identified on the location maps.

For snowfall events where the forecast accumulation exceeds 15 cm, and snowfall continues after the initial clearing has been completed, the following additional clearing requirements apply:

- **North Stormont Place:** Initial clearing is required at 5 cm of accumulation. The site must be cleared and accessible before the facility opens. Additional clearing is required each time a further 10 cm of snow accumulates after the previous clearing.
- **All other locations:** Initial clearing is required at 8 cm of accumulation. Additional clearing is required each time a further 15 cm of snow accumulates after the previous clearing.

Salting

Salt shall be applied to all areas cleared of snow, at a target application rate of 50 g/m².

Additional Service Requests

The Township may request additional snow clearing or ice control on an on-call basis when operational requirements or special events require service outside normal winter maintenance activities. These services shall be billed at the applicable per-trip rates submitted by the Proponent.

3. Revision to Form of Quotation

The “FORM OF QUOTATION” is amended as follows:

The Form of Quotation has been revised and is attached to this Addendum. The attached form shall replace the original in its entirety and must be completed and submitted as part of the Proponent’s quotation.

4. General

All other terms, conditions, specifications, and requirements of RFQ-PW-02-2026 remain unchanged.

FORM OF QUOTATION
RFQ-PW-02-2026 Snow Clearing

The Proponent acknowledges that they have reviewed the specifications, requirements, and conditions of this RFQ and, where applicable, inspected the locations. By submitting this quotation, the Proponent agrees to provide the required labour, equipment, materials, and services in accordance with the RFQ and the prices provided below.

The Proponent hereby submits the following quotation for the services described in this RFQ. Quoted prices are exclusive of HST.
